

LAKE STEWARD

The 'relentlessly positive' neighbor-to-neighbor program protecting lakes one shoreline at a time

Did you know that a mowed shoreline allows 7-9 times more pollutants to enter the water than a naturally vegetated shoreline?
(MN DNR)

And yet...

Minnesota's natural shorelines are disappearing at a rate of 1-2% per decade- equivalent to the length of MN's North Shore every 2 years!

We need to change the norm.

Be a Lake Steward!

Join hundreds of others across MN who are proudly protecting water quality and habitat with their natural shorelines.

Take the Quiz to start!
